*Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.*

NEWTON

*La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.*

EULER

*Ceux qui aiment l'Analyse, verront avec plaisir la Mécanique en devenir une nouvelle branche ...*

LAGRANGE

---

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

## CONTENTS OF VOLUME 5

	Page
ADKINS, J. E., Further Symmetry Relations for Transversely Isotropic Materials . . . . .	263
BRILLOUIN, L., Poincaré and the Shortcomings of the Hamilton-Jacobi Method for Classical or Quantized Mechanics . . . . .	76
BUTZER, P. L., Fourier-Transform Methods in the Theory of Approximation . . . . .	390
BUTZER, P. L., & H. KÖNIG, An Application of Fourier-Stieltjes Transforms in Approximation Theory . . . . .	416
CHARZYNSKI, Z., & M. SCHIFFER, A New Proof of the Bieberbach Conjecture for the Fourth Coefficient . . . . .	187
EDELEN, D. G. B., The Invariance Group for Hamiltonian Systems of Partial Differential Equations. I. Analysis . . . . .	95
FRIEDMAN, A., Mildly Nonlinear Parabolic Equations with Application to Flow of Gases through Porous Media . . . . .	238
GEURST, J. A., Some Investigations of a Linearized Theory for Unsteady Cavity Flows . . . . .	315
HARRIS, W. A., JR. Singular Perturbations of Two-Point Boundary Problems for Systems of Ordinary Differential Equations . . . . .	212
IKEBE, T., Eigenfunction Expansions Associated with the Schroedinger Operators and their Applications to Scattering Theory . . . . .	1
KANWAL, R. P., & C. TRUESDELL, Electric Current and Fluid Spin Created by the Passage of a Magnetosonic Wave . . . . .	432
KAZARINOFF, N. D., & R. K. RITT, Scalar Diffraction Theory and Turning-Point Problems . . . . .	177
KEARSLEY, E. A., Bounds on the Dissipation of Energy in Steady Flow of a Viscous Incompressible Fluid around a Body Rotating within a Finite Region . . . . .	347
KELLER, J. B., The Shape of the Strongest Column . . . . .	275
KÖNIG, H. see BUTZER	
LEVIN, J. J., & J. A. NOHEL, Global Asymptotic Stability for Nonlinear Systems of Differential Equations and Applications to Reactor Dynamics . . . . .	194
